

## Cardiology EHR Software

With cardiology specific templates and a unique ability to customize and adapt to your specific practice workflow, MediTouch is a great choice for any cardiology practice.

### MediTouch Cardiology EMR

MediTouch for cardiologists comes with a variety of cardiology specific content and workflow capabilities. If you are performing in-office stress tests, and require your patients to move from examine room to testing room, MediTouch EHR optimized for mobile iPad or tablet moves with you.

Physical exam templates such as cholesterol lipid analysis and Coumadin flowsheets have all of the findings required for any cardiologist to document the standard physical exam. If you need to add a finding, we supply a simple interface to match the one you typically use in your practice.

## **Cardiology Specific Features and Templates**

- **Cholesterol Lipid Analysis**
- **Coumadin Flowsheets**
- **Angina Pectoris**
- **Aortic Disease**
- **Congestive Heart Failure**
- **Hypertension**
- **Palpitations**
- **Coronary Artery Disease**
- **High Blood Pressure**
- **Valvular Heart Disease**
- **And Many, Many More...**

## **Cardiology EHR Care Plans**

A Care Plan is a pre-formatted, fully customizable interface that is used to document your treatment objectives and goals regarding a specific diagnosis. Meaningful Use Stage 2 requires this documentation, when applicable, in each encounter note, and with MediTouch we make it simple.
