

## Ear, Nose, and Throat EHR Software

With ear, nose, and throat specific templates and a unique ability to customize and adapt to your specific practice workflow, MediTouch is a great choice for any otolaryngology practice.

### Otolaryngology EHR

A multidisciplinary medical specialty needs a versatile EHR. This is why MediTouch electronic health records software comes pre-loaded with otolaryngology specific language and templates. Whether treating an ear infection, nerve damage, or sinus problems – MediTouch is designed to think like you do, and is easily customizable to your preferred charting process.

### Otolaryngology EHR Features

- **Pre-loaded with data and findings to begin charting on first login**
- **Connected to all major labs to view and order results**
- **Perform a complete SOAP note from start to finish**
- **Chart at point of care and maintain eye contact with patient**
- **2014 Certified Meaningful Use Stage 2 built-in**

### Ear, Nose, and Throat EHR Care Plans

A Care Plan is a pre-formatted, fully customizable interface that is used to document your treatment objectives and goals regarding a specific diagnosis. Meaningful Use Stage 2 requires this documentation, when applicable, in each encounter note, and with MediTouch we make it simple.
