

Neurology EHR Software

Our strong focus on neurology and our unique ability to customize and adapt to your specific practice workflow makes MediTouch a great choice for any neurologist.

Neurology EHR

The high level of complexity in dealing with the human nervous system requires a neurology EHR software that neurologists can rely on. MediTouch EHR was created by doctors for doctors, and is designed to think like you do. It comes pre-loaded with features geared specifically towards neurologists and others in the field of neurology, and it is highly customizable to fit the needs of any individual doctor or practice.

Neurology EHR Features

- Built-in neurology physical exam designed for touchscreen – fast and simple
- Easily review radiology reports while documenting the current encounter
- Chief compliant forms for dizziness, headaches, gait disturbance and so much more
- Referral letters are a tap of the fingertip away

Neurology EHR Care Plans

A Care Plan is a pre-formatted, fully customizable interface that is used to document your treatment objectives and goals regarding a specific diagnosis. Meaningful Use Stage 2 requires this documentation, when applicable, in each encounter note, and with MediTouch we make it simple.
