

ObGyn EHR Software

Our strong focus on obstetrics and gynecology and our unique ability to customize and adapt to your specific practice workflow makes MediTouch a great choice for today's Ob/Gyn.

MediTouch Ob/Gyn EMR

Giving birth to our Ob Gyn EHR was truly a labor of love. Our Ob Gyn EHR software was designed with input of practicing obstetricians and gynecologists, and it possesses design features specific to women's healthcare. From pregnancy to term, MediTouch EHR is simply the best way to document obstetric and gynecologic healthcare findings using the iPad, no other competitor comes close.

Features

- Create perfectly formatted antepartum forms
- Automatically fax the completed antepartum form to the designated labor and delivery facility
- Easy to record pregnancy history
- Import Ultrasound Images
- Create Ultrasound Flow Sheets
- Order and record prenatal lab tests and results
- Obstetrics and Gynecology physical exam findings are preloaded
- Automatic calculation of EDD
- View a single day's observation or all observations in a simple grid
- Wirelessly capture a patient image with your smart phone and annotate the image using our revolutionary EHR drawing feature

Obstetrics and Gynecology EHR Care Plans

An EHR Care Plan is a pre-formatted, fully customizable interface that is used to document your treatment objectives and goals regarding a specific diagnosis. Meaningful Use Stage 2 requires this documentation, when applicable, in each encounter note, and with MediTouch we make it simple.
