

Orthopedics EHR Software

Our strong focus on orthopedics and our unique ability to customize and adapt to your specific practice workflow makes MediTouch a great choice for any orthopedic practice.

MediTouch Orthopedics EHR

We understand the fast-paced practice of orthopedics and have taken steps to ease the stress for you – so you don't have to. MediTouch orthopedic EHR software comes pre-loaded with orthopedic templates and care plans that help support an efficient patient flow and safe clinical encounters.

The included MediDraw feature makes it easy to draw on a picture of a patient finding – either on a photo of the patient or an anatomical outline image. And compared to competitors – you get MediTouch EHR for a fraction of the price.

Additional Orthopedics EHR Features

- Dictation ready with Dragon Dictate in any text field
- Meaningful Use compliant out of the box
- iPad native and ready to move when you move
- Pre-loaded with orthopedic specific terminology

Orthopedics EHR Care Plans

A Care Plan is a pre-formatted, fully customizable interface that is used to document your treatment objectives and goals regarding a specific diagnosis. Meaningful Use Stage 2 requires this documentation, when applicable, in each encounter note, and with MediTouch we make it simple.
