

Pain Management EHR Software

With a strong focus on pain management, and a unique ability to customize and adapt to your specific practice workflow – MediTouch is the perfect choice for any pain management physician.

MediTouch Pain Management EMR

Easing the suffering and improving the quality of life for those living with pain requires a certain level of compassion. The pain management practice is complex, and whether your care plan involves pharmacological treatment, interventional procedures, or alternative therapy, MediTouch is easily customizable to suit the unique needs of the pain management specialist. Ensure efficient and reliable quality of care by creating intuitive, customized evaluations and treatment plans for your valued patients. The MediTouch iPad/tablet ready platform eliminates the distraction of a traditional computer screen at point of care, allowing for more face to face time with patients.

Pain Management EHR Software Features

- Pre-loaded injection procedures designed for touch screen
- Easily import data from previous notes to demonstrate how patient's pain improves over time
- New flow sheet capabilities allow physicians to easily review past treatments given and lab results.
- Easy to print controlled substances onto state regulated printing paper
- Rx history import from Surescripts

Pain Management EHR Care Plans

A Care Plan is a pre-formatted, fully customizable interface that is used to document your treatment objectives and goals regarding a specific diagnosis. Meaningful Use Stage 2 requires this documentation, when applicable, in each encounter note, and with MediTouch we make it simple.
