

Surgery EHR Software

Our unique ability to customize and adapt to your specific workflow makes MediTouch a great choice for any surgical center.

MediTouch Surgery EHR

We understand that surgery is one of the most high-risk and complicated medical disciplines out there, and we want to help make your life easier. MediTouch EHR offers a number of cutting edge features specifically designed to streamline surgical charting and scheduling, using a system that mimics how you were trained to chart.

The MediTouch surgery EHR allows you to access important information on the go, without the need for a bulky computer screen to come between you and your patients.

Surgery EHR Features

- Pre and post procedure chief complaints and care plans
- Intuitive touchscreen interface
- Quick access to patient charts and information
- Easily customizable to meet your anticipations
- Pre-loaded templates geared towards your specific needs
- Accessible wherever there is an internet connection

Surgery EHR Care Plans

A Care Plan is a pre-formatted, fully customizable interface that is used to document your treatment objectives and goals regarding a specific diagnosis. Meaningful Use Stage 2 requires this documentation, when applicable, in each encounter note, and with MediTouch we make it simple.
