

## New V-14 Features List

**UB-04**—Medisoft V14 Advanced and Network Professional will now support your institutional claims as well as professional claims. You will be able to print your claim on paper or save it to a print image file. Most clearinghouses that accept UB-04 claims will be able to accept a print image file.

**Custom Dates on ERA Posting:** You can chose to either post on the bill date or on the date you enter the charge.

**Global Days:** Allows you to set up a surgical procedure code for follow up visits that will be tracked by the program and automatically be entered as a zero charge during the global days. At the end of the specified time period normal charges will show.

**Billing for 8 Diagnosis Codes:** In the Advanced and Network Professional version you will have the option of billing for 8 lines of code electronically or on UB-04.

**Patient Quick Entry:** This is a fantastic new feature that will make patient transaction entry faster and more accurate. Now Medisoft offers you one stop access to everything you need to enter a new patient or establish a case. Patient Quick Entry can be completely customized to fit you practices needs, ensure quick and easy access to only the information that is important to you. Create templates for quick entry access based on any situation you choose. Need a new patient template for Medicare or Medicaid? No problem. With Patient Quick Entry, you can establish an endless number of new patient entry templates to ensure efficient front office operations. This feature also allows user to add patients to the appointment Wait List.

**Multi Practice Conversion:** For billing services you can now convert all of the practice at one time, no need to open each practice.

**Scheduled File Maintenance:** Automatically run file maintenance each night after you leave so that your data is always in a pristine state.

**Dashboard:** This powerful feature provides Office Managers with a summary view into a single practice, or across multiple practices. The Dashboard runs independent of Medisoft and allows for executive level insight into the information that matters most to you and your practice. Over a dozen important key financial indicators are available to choose from such as total appointments for the day, payments, charges, collections and much more. With MediSoft's Dashboard, you can also monitor trends and establish warning level alerts for your practice based on any number of critical factors. All of this is completely customizable by the user.

**Import/Export:** Now you can import or export Medisoft tables into a new data set.
